Claim 13 has been canceled. Claims 1-12 and 14-29 are pending.

Applicant asks for reconsideration of the withdrawn status of claims 12 and 14-16 because the latest amendment of the claims essentially brings them into consistency with claims 1-11. The request is denied. Amending a withdrawn claim doesn't change its status from withdrawn because restriction is based upon the status and amended version of the claims at the time of restriction. Applicant doesn't show any error in the restriction requirement. Therefore, the restriction is maintained and claims 12-16 remain withdrawn.

Claims 12 and 14-28 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on August 29, 2005.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 10 and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 10 states in the preamble that the pressure vessel is liner-less in lines 1 and 2, enclosing the inner liner of lines 4 and 5 within an outer shell contradict the "liner-less" limitation of claim 10. This is indefinite.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4-6 and 8-9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Bastone.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2, 3, 7, 10 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bastone in view of Adams.

Bastone discloses the invention except for outer shell wall. Adams teaches an outer shell wall disposed about an inner shell wall and is secured thereto. It would have been obvious to add the outer shell wall to provide a structural layer to provide resistance to external impact as well as increase the overall resistance and strength rating pertaining to internal pressure of the tank.

Claim 29 is allowed.

Applicant's arguments with respect to claims 1-11 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
